

Antonio Esposito is a Full Professor of Radiology at the University Vita-Salute San Raffaele and Deputy Scientific Director of IRCCS San Raffaele Hospital. He also serves as Director of the Center for Experimental Imaging, driving innovation in advanced imaging technologies. He is a leading expert in advanced MR and CT imaging, with special interest in cardiovascular diseases and in oncology.

Prof. Esposito has been at the forefront of integrating Artificial Intelligence into radiology, enhancing diagnostic precision and predictive analytics. He directs the Advanced Imaging for Personalized Medicine Unit, a department of radiology with the mission of providing medical service and research through state-of-the-art imaging modalities, including photon counting CT and high field MRI. With over 300 publications in high-impact scientific journals, he has led and contributed to numerous national and international research projects. He also founded and now coordinates the inter-university Master's Program in Health Informatics, a collaboration between UniSR and Politecnico di Milano, shaping the next generation of digital health leaders. As Co-Director of the Strategic Artificial Intelligence Program at San Raffaele, he spearheads initiatives that integrate AI into medicine, fostering personalized, data-driven, and more sustainable healthcare solutions.
